## A few words about myself

A non CSE front-end developer. I started learning web development for curiosity, and now it's my profession. I have started as a WordPress developer and completed 450+ project over the world. Since 2021, I am learning ReactJS and built some amazing web application. I love to learn new technology and addicted to code :)

## Hard Skills

## Soft Skills

Figma, Photoshop, Framer motion, Rest API, Git,

## Certification

### React Developer

Udemy 2022

### Advanced WordPress Developer

Soft-tech it 2020

## Education

### Debigonj Govt College

2016 - 2019

Bachelor of Social Science

## Qualities

- Self learning capability
- Passion for coding
- Hard working

## Experience

**Web Designer | KAT-USA LLC** Sep 2019 - May 2020

Responsibilities:

- Discussing website design and function
- Collaborating with designers, and other developers.
- Managing WordPress themes and plugins.
- Design new layouts with responsive
- Monitoring the performance of the live website.

## Open Source Project

**Contribution | ReactPlay.io | [Source code](#) | [Preview](#)**

What I have done: Fully functional smart todo app built with React to keep track of the tasks you plan to complete. Users can create a task, edit a task, mark a task as 'complete' and delete a task and also can delete all the tasks by one click.

Implementation Details:

- Event Handling
- State Management

## Notable Project

**Real time chat application | [Source code](#) | [Preview](#)**

Project Summary: It's a real time chat web application where two person can chat in real time.

Major challenges:

- API develop
- State management
- Send message in real time
- Authentication

Technology used:

- Front End: React, Redux, tailwind,
- Backend: Node.js, Express, MongoDB, Bcrypt, JWT, Muler.
- Socket server: Socket.io
